

Project Title: Upgraded Subway Ordering System

Student Name: Gun Daniel Lee

Student ID: 2021315385

1. Project context and Goals

SKKU's Subway store is usually has a lot of customers. This causes customers to wait in line for a decent amount of time. This project's system will allow customers to order quickly.

2. Main Functionalities

[Owner] Login and see the products list

[Owner] Add products

[Owner] Remove products

[Owner] Disable certain features or products (due to lack of ingredients)

[Customer] Order products

[Customer] Search for specific products

[Customer] Have the choice to randomly select a product

3. How many pages will there be?

- Owner: login page, menu page, edit product page (add, delete, edit or disable)

- 3 pages

- Customer: Menu page, vegetables and additional request page, menu search page, randomize menu page

- 4 pages

4. Similar Existing Solutions

1. Kiosks

2. Self-ordering system of restaurants and cafes

3. Assignment 3 (Subway ordering system)
